Who Gets Credit? Bias and Attribution in Team vs. Solo Work
(with Alexander Coutts)

Collaboration is a key driver of productivity in organizations and intellectual work, yet it can make it harder to recognize individual contributions. Bias, especially gender bias, can further distort evaluations, shaping both how people choose to collaborate and how their work is assessed. In this study, we run an experiment to understand how individuals decide whether to work alone or in teams, knowing their past performance will be judged by a third-party evaluator. Evaluators, in turn, must weigh the trade-off between the potential benefits of selecting a collaborative worker and the uncertainty about their individual abilities. To explore the role of gender in these decisions, we compare a baseline anonymous setting to a treatment where gender is publicly revealed, creating common knowledge of potential biases. Our findings reveal how men and women adjust their willingness to collaborate when they know their gender is visible, shedding light on both the reality of gender biases in evaluation and how accurately individuals perceive them. Ultimately, our results highlight how collaboration can be made more effective, both overall and in ways that account for gender dynamics, helping organizations design fairer and more productive work environments.

Work in Progress

Measuring the Impacts of Interpersonal Conflict Management and Dispute Resolution Skills Training on Academic Success: A Field Experiment (with Fulya Türk and Selcuk Ozyurt).

Can Online Dispute Resolution Advance Gender Equality? Contrasting with Traditional Mediation (with Onur Kesten and Selcuk Ozyurt)

The Design and Pricing of Customized Data (with Selcuk Ozyurt)

Scholarships, Awards, and Honors

Dissertation Fieldwork Fellowship 2024-2025

York University Doctoral Fellowship 2021—2025

Full Scholarship for Master's Degree at the University of TOBB ETU 2019–2021

Full Scholarship for Bachelor's Degree at the University of TOBB ETU 2014–2020

Academic Achievement Grant, University of TOBB ETU 2014–2020

National Assessment Examination Achievement Scholarship, Government of the Turkish Republic 2007–2014

Presentations

Canadian Economic Association (planned), 2025

York University Brown Bag Seminar, 2024

Boston College Experimental Economics Group, 2023

Research Experience

RA for Selcuk Ozyurt, York University, Department of Economics, 2022-2025

RA for Alexander Coutts, York University, Schulich School of Business, 2023-2024

Teaching Experience

Teaching Assistant, York University

Applied Microeconomics (M.A.), 2021, 2023, 2024

Game Theory, 2021, 2023, 2025

Intermediate Microeconomics, 2022, 2023, 2024

Teaching Assistant, TOBB ETU

Microeconomic Theory, 2020

Intermediate Microeconomics, 2020

Econometrics, 2021

Other Positions

President, Economics Graduate Student Association (EGSA), York University (2024–Present)

Program Coordinator, Erasmus Student Network (ESN), Finland (2018-2019)

Additional Information

Programming: JavaScript, Python, MATLAB

Experience with: Stata, Qualtrics, Prolific

Languages: English (fluent), Turkish (native), Korean (intermediate), french (beginner)
